REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

An independent Claim 1 discloses a method for monitoring an electromagnetic switching device for correct connection, which inter alia includes coupling a monitoring circuit to the contacts before the contact bridge is moved into connection position and determining the correct connection of the contacts by evaluation of a voltage drop across the contacts. The closest reference for the claim is Waggamon (US 5,455,733), which discloses monitoring the contacts. However, unlike the instant invention, it performs the monitoring through the circuit permanently connected across the contacts. The other reference, Itoga (EP 0 660 348) discloses monitoring the contacts, as well. However, unlike the instant invention, its auxiliary contact is normally closed. The recited limitation is repeated over again in all other independent claims 8 and 31, thus making the case allowable.

Allowability resides, at least in part, in the above-described limitations, which has not been disclosed in the Prior Art in a search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zeev Kitov whose telephone number is (571) 272-2052.
